

Thrive Chiropractic Center: Supplements and Products

Standard Process Catalyn - \$36 - 4 month supply daily vitamin supplement.

The name Catalyn reflects the product's catalytic effects—the vitamin, mineral, and enzyme complexes are delivered in whole-food, concentrated form for optimal utilization by the body. Catalyn also contains animal tissue from organs and glands (adrenal, liver, kidney, and spleen) to support the corresponding tissues in humans. This whole food supplement is infinitely more useful to the body than the popular synthetic vitamins that are not able to be absorbed and used.

Omega Sufficiency - \$45 - 3 month supply oil or 7 week supply capsules.

This is the purest, most natural fish oil available with perfect EPA:DHA ratios. Omega 3 essential fatty acids have been scientifically shown to be a crucial requirement for health and important in the prevention of illnesses such as heart disease, arthritis, ADD, depression, stroke, cancer, diabetes, high blood pressure, obesity, osteoporosis, eczema, learning and cognitive development problems, and Alzheimer's. The typical American diet contains significantly more Omega 6 fats than Omega 3 fats—resulting in imbalances to every cell.

Natural Calm - \$22 - 6 week supply. Magnesium is essential to good health—helping maintain normal muscle cells, nerve activity, and metabolism. It helps regulate blood sugar and blood pressure levels. Due to nutrient-deficient soil and fast-paced lifestyles, few of us (estimated at less than 20 percent) get sufficient magnesium in our diets. Natural Calm is the best-selling, award-winning magnesium that mixes easily in water to restore healthy magnesium levels quickly and effectively. Symptoms that result from a lack of magnesium include low energy, weakness, sleeping trouble, muscle tension, nervousness and constipation.

Pro-Optimal Whey - \$35 - 18 Servings. Whey protein contains all amino acids in the best balance of any food source. Milk from grass-fed cows is used for the whey in this protein supplement mix. Grass fed cows produce higher levels of CLA and balanced fatty acids. The unique production method insures the whey is minimally processed—retaining the immune boosting and regenerative components of raw milk. The chocolate flavor is sweetened with stevia—no sugar. It's easy to mix with water.

Sombra - \$17 jar, \$10 roll-on. Sombra relieves minor aches and pains of muscles and joints associated with arthritis, simple backaches, strains, bruises and sprains. It absorbs quickly with a refreshing orange scent. It has a unique warming sensation and is alcohol free, non-greasy, and non-staining.

Biofreeze - \$12 tube, \$12 roll-on. Biofreeze products are effective pain relievers formulated to provide a variety of benefits for therapy, pain relief, exercise/training and overall comfort. They contain ILEX, an herbal extract from a South American holly shrub. Help relieve pain from: sore muscles, sprains, back and neck pain, joint pain and arthritis.
