

GENERAL INFORMATION

Child's Name _____ Birth Date ____/____/____

Parent(s)/Guardian(s) Name _____ Mobile phone _____

Address _____ City/State/Zip _____

Any siblings? Please list names and ages _____

Is your child receiving care from other health professionals? __ Yes __ No If yes, please name them and their specialty

How did you find us? Whom may we thank for referring your child? _____

CHILD'S CURRENT HEALTH

What is the reason your child is seeking services here? _____

Are there any other health concerns your child may be experiencing? _____

What changes in your child's health or behavior would you like to see? _____

BIRTH HISTORY

Child's birth was: At home At a birthing center At a hospital

My obstetrician/midwife's name: _____

Child's birth was

- Natural vaginal (no medications/interventions)
- Vaginal with interventions
 - Induction Pain medication
 - Epidural Episiotomy
 - Forceps Vacuum Extraction
 - Other _____
- C-section
 - Scheduled
 - Emergency

Please list any reasons for any interventions/complications _____

— GROWTH & DEVELOPMENT —

Is/was your child breastfed? Yes No If yes, how long? _____

Any formula introduced? _____ What type? _____ Began solid foods at age _____

Any difficulty breastfeeding? Yes No If yes, please explain _____

Any difficulty with bonding? Yes No If yes, please explain _____

Please list any surgery, hospitalizations, or diagnoses we should know about:

Please list any accidents/falls/traumas resulting in major bruises, fractures, stitches, your child has sustained:

Does your child have a good sleeping pattern? Yes No Please explain _____

Does your child seem 'normal' for their age? Yes No Please explain _____

Briefly describe your child's diet and water intake: _____

Any issues with gluten, dairy or other food sensitivities/allergies? _____

Would you rank your child's consumption of any of the following more than occasional/minimal:

Caffeine Soda Sugar Artificial sweetener Fast food Processed foods

Any behavioral problems? Yes No If yes, please explain _____

Any sports participation or activities? Yes No Please describe _____

— CHEMICAL STRESSORS —

Is your child taking any medications currently? Please list: _____

Has child received any antibiotics Yes No If yes, approx. how many times and list reason _____

Has your child received any vaccinations? Yes, regular schedule Yes, modified schedule None

Reactions to vaccination: None Fever Diarrhea Rash Welt at injection Fatigue

Seizures Prolonged Cry Developmental Regression Other

Does your child receive annual flu shots? Yes No

REVIEW OF SYSTEMS

Please indicate if your child is experiencing/has experienced any of the following:

Voicemail Preferences

I agree that voice messages can be left on any of the phone numbers listed on first page of this form with details about my child's appointments and chiropractic care.

Email Preferences

Email Address of Parents: _____

I agree to receive personal emails regarding my child's care, appointments, and payments.

I would like to receive, or continue receiving, monthly email newsletters with health tips, research, recipes and information about Thrive Chiropractic events. I can easily unsubscribe at any time if I do not find these newsletters valuable.

Text Message Reminders

I would like to receive, or continue receiving, text message reminders 24 hours in advance of my child's scheduled appointments.

Cancellation Policy

I understand that Thrive Chiropractic requires 24-hour notice for canceling appointments. I may be charged \$25 for any missed appointments if I fail to show up or fail to give 24-hour notice.

Informed Consent to Care

You are the decision maker for your health care. Part of our role is to provide you with information to assist you in making informed choices. This process is often referred to as “informed consent” and involves your understanding and agreement regarding the care we recommend, the benefits and risks associated with the care, alternatives, and the potential effect on your health if you choose not to receive the care.

We may conduct some diagnostic or examination procedures if indicated. Any examinations or tests conducted will be carefully performed but may be uncomfortable.

Chiropractic care centrally involves what is known as a chiropractic adjustment. There may be additional supportive procedures or recommendations as well. When providing an adjustment, we use our hands or an instrument to reposition anatomical structures, such as vertebrae. Potential benefits of an adjustment include restoring normal joint motion, reducing swelling and inflammation in a joint, reducing pain in the joint, and improving neurological functioning and overall well-being.

It is important that you understand, as with all health care approaches, results are not guaranteed, and there is no promise to cure. As with all types of health care interventions, there are some risks to care, including, but not limited to: muscle spasms, aggravating and/or temporary increase in symptoms, lack of improvement of symptoms, burns and/or scarring from electrical stimulation and from hot or cold therapies, including but not limited to hot packs and ice, fractures (broken bones), disc injuries, strokes, dislocations, strains, and sprains.

With respect to strokes, there is a rare but serious condition known as an “arterial dissection” that typically is caused by a tear in the inner layer of the artery that may cause the development of a thrombus (clot) with the potential to lead to a stroke. The best available scientific evidence supports the understanding that chiropractic adjustment does not cause a dissection in a normal, healthy artery. Disease processes, genetic disorders, medications, and vessel abnormalities may cause an artery to be more susceptible to dissection. Strokes caused by arterial dissections have been associated with over 72 everyday activities such as sneezing, driving, and playing tennis.

Arterial dissections occur in 3-4 of every 100,000 people whether they are receiving health care or not. Patients who experience this condition often, but not always, present to their medical doctor or chiropractor with neck pain and headache. Unfortunately, a percentage of these patients will experience a stroke.

The reported association between chiropractic visits and stroke is exceedingly rare and is estimated to be related in one in one million to one in two million cervical adjustments. For comparison, the incidence of hospital admission attributed to aspirin use from major GI events of the entire (upper and lower) GI tract was 1219 events/per one million persons/year and risk of death has been estimated as 104 per one million users.

It is also important that you understand there are treatment options available for your condition other than chiropractic procedures. Likely, you have tried many of these approaches already. These options may include, but are not limited to: self-administered care, over-the-counter pain relievers, physical measures and rest, medical care with prescription drugs, physical therapy, bracing, injections, and surgery.

Lastly, you have the right to a second opinion and to secure other opinions about your circumstances and health care as you see fit.

I have read, or have had read to me, the above consent. I appreciate that it is not possible to consider every possible complication to care. I have also had an opportunity to ask questions about its content, and by signing below, I agree with the current or future recommendation to receive chiropractic care as is deemed appropriate for my circumstance. I intend this consent to cover the entire course of care from all providers in this office for my present condition and for any future condition(s) for which I seek chiropractic care from this office.
